Educational Suppliers' Buyer's Guide

PLASTO CREATES THE TOYS – CHILDREN CREATE THE PLAY

Plasto is a Finnish manufacturer of high quality plastic toys. Our bright coloured, durable toys leave room for imagination and encourage creativity in children.

Play value – Children like colourful toys. The function of our toys encourages imaginative play and enables children to develop their own ideas. Our toys do not have sound, light or any other battery operated functions. Plasto toys invite and inspire children to play, which in its turn gives children new experiences and allows them to explore!

Inspire to learning – By having fun and playing, children learn the skills they need later on in their lives. The fundamentals of self-confidence and belief in ones personal abilities are founded in play. We continuously develop our product portfolio and design toys that inspire to playing and learning.

Durability – Plasto toys are made to last: they are very robust and sturdy. Our toys are suited both for indoor and outdoor use.

Safety – The safety of toys is essential to us. This applies to the raw materials, design and construction. All of our products are CE approved and tested according to EN71 and ASTM. In practice this means that there are no sharp edges or corners nor small parts in our toys. All of our toys are manufactured of plastic approved for use in the food industry. There are no phthalates or PVC in our toys. The colours we use do not contain lead, cadmium or any other harmful chemicals.
